

Lead Shielded Handling Counter 0.80 to 1 m wide and Lead Shielded Handling Counter 1.5 m to 2.0 m wide

ARPLAY has developed a complete range of shielded counters for the handling of radio-actives sources.

The manipulator would certainly find the model he needs among those units ranging from the smallest to the largest, with or without protected front side, with cupboard or with leaded storage pit, with a fixed or with a mobile screen,

The displayed lengths are standard. However ARPLAY adapts those units to desired dimensions provided by the customer, so that the counter perfectly fits into its environment.

The framework of each model includes a lead shielding of 20 mm thick under the horizontal working bench and a 40mm thick lead slab in the vertical part. The protective screens, either they be fixed or mobile depending on the available versions, are endowed for the vision, of an 80mm lead glass (equivalent to 50% lead). Each model is meant to support a maximum load of 1000 kg distributed over the Surface.

Maximum Protection: 30 mCi of Cs137.
